# API

## 1. ADMIN

As an ICBC facility admin, manage locations and floor plans, workspace features, and more

### 1.1 POST /admin/upload-floor-data

#### Upload a CSV of a floor's workspaces

Upload a CSV containing information about each workspace on a floor (owner and features)

#### REQUEST

##### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
floorId	integer	
floorData	string(binary)	

#### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Something went wrong

RESPONSE MODEL - text/plain

string

### 1.2 POST /admin/upload-floorplan-image

#### Upload a JPG floor plan for a specific floor

#### REQUEST

##### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
floorId	integer	
floorplanImage	string(binary)	

#### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Something went wrong

RESPONSE MODEL - text/plain

string

### 1.3 POST /admin/login

#### Login to admin portal

## REQUEST

### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
password	string	

## RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
{
  message string
  token   string
}
```

STATUS CODE - 403: Forbidden

RESPONSE MODEL - text/plain

string

## 1.4 GET /admin/locations

A list of all the location names

## REQUEST

No request parameters

## RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

## 1.5 POST /admin/locations

Add a location

## REQUEST

### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
locationName	string	

## RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Empty String, All Whitespaces, or Duplicate Name

RESPONSE MODEL - text/plain

string

## 1.6 DELETE /admin/locations

Delete a location

### REQUEST

#### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
*locationName	string	Location Name

### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

RESPONSE MODEL - text/plain

string

## 1.7 GET /admin/floors

Gets list of floors

### REQUEST

#### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
*city	string	City Name

### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

## 1.8 PUT /admin/floors

Updates a floor

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
floorId	integer	
floorNo	integer	
building	string	
city	string	
location	string	

RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
{
  floorId integer
}
```

STATUS CODE - 400: Bad Request

RESPONSE MODEL - text/plain

```
string
```

1.9 POST /admin/floors

Adds a new floor

REQUEST

FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
floorNo	integer	
building	string	
city	string	
location	string	
floorplanImage	string(binary)	

RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
{
  floorId integer
}
```

1.10 DELETE /admin/floors/{id}

Delete a Floor

REQUEST

PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	integer	Floor Id

RESPONSE

STATUS CODE - 200: Successful Operation

### 1.11 GET /admin/workspaces/{floorId}

Gets list of workspaces

#### REQUEST

##### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*floorId	integer	Floor Id

#### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
[{  
  Array of object:  
}]
```

### 1.12 DELETE /admin/deleteWorkspace/{id}

Delete a Workspace

#### REQUEST

##### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	string	Workspace Id

#### RESPONSE

STATUS CODE - 200: Successful Operation

### 1.13 PUT /admin/workspaces/{id}

Updates a workspace

#### REQUEST

##### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	string	Workspace Id

##### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
email	string	

#### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 403: Bad Request

RESPONSE MODEL - text/plain

string

---

## 1.14 POST /admin/workspacefeature/add

Add a workspace feature

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
workspaceId	string	
featureName	string	

### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

RESPONSE MODEL - text/plain

string

---

## 1.15 POST /admin/workspacefeature/delete

Delete a workspace feature

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
workspaceId	string	
featureName	string	

### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

RESPONSE MODEL - text/plain

string

---

## 1.16 POST /admin/reset-features

Resets the list of features to a custom specified list

Sets the list of features in the system. Previous features that do not exist in this list are deleted, and new features are added. Does not affect features that exist both previously and in this list

### REQUEST

## RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

---

## 2. OFFICEBOOKING

As an ICBC employee, make a Booking on an office in any ICBC location

### 2.1 GET /floors

Get either floor information of all floors, floorId, or by location

#### REQUEST

##### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
floorId	number	
location	string	

#### RESPONSE

STATUS CODE - 200: Successful Operation

### 2.2 GET /features

Get features by availabilityId, workspaceId, or all features if no params

#### REQUEST

##### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
availabilityId	number	
workspaceId	string	

#### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

### 2.3 GET /locations

A list of all the location names

#### REQUEST

No request parameters

#### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

---

*startDate	date	
*endDate	date	
floorIds	array of number	
features	array of number	

## RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

---

## 2.5 GET /availabilities/top/{amount}

### Finds top availabilities, not filtered

## REQUEST

### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*amount	number	

## RESPONSE

STATUS CODE - 200: Successful Operation

### RESPONSE MODEL - application/json

```
[{  
  Array of object:  
    availabilityId integer  
    startDate      string  
    endDate        string  
    workspaceId    string  
    workspaceName  string  
    floorId        integer  
    location        string  
    bookings [{  
      Array of object:  
        bookingId integer  
        startDate  string  
        endDate    string
```

```

        user {
            staffId    integer
            email       string
            firstName   string
            lastName    string
            department  string
            valid       boolean
        }
    }
}

```

STATUS CODE - 400: Bad Request

## 2.6 GET /availabilities

Finds Availabilities, filtered by various properties, of which startDate and endDate are required

### REQUEST

#### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
*startDate	date	The first date of the search range
*endDate	date	The last date of the search range
location	string	Office building location
floor	string	Floor of building
features	array of string	Features to filter by

### RESPONSE

STATUS CODE - 200: Successful Operation

#### RESPONSE MODEL - application/json

```

[ {
  Array of object:
    availabilityId  integer
    startDate       string
    endDate         string
    workspaceId     string
    workspaceName   string
    floorId         integer
    location        string
    bookings [ {
      Array of object:
        bookingId   integer
        startDate    string
        endDate      string
        user {
          staffId    integer
          email       string
          firstName   string
          lastName    string
          department  string
          valid       boolean
        }
      }
    ]
  }
]

```

```
}]
}]
```

STATUS CODE - 400: Bad Request

---

## 2.7 POST /lockWorkspace

Temporarily lock a Booking as the User enters confirmation page

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
availabilityId	integer	
staffId	integer	
startDate	string	
endDate	string	

### RESPONSE

STATUS CODE - 200: Successful Operation

#### RESPONSE MODEL - application/json

```
{
  bookingId  integer
  startDate  string
  endDate    string
  user {
    staffId   integer
    email     string
    firstName  string
    lastName  string
    department string
    valid     boolean
  }
}
```

STATUS CODE - 400: Bad Request

STATUS CODE - 403: Locking of booking unsuccessful

---

## 2.8 DELETE /lockWorkspace/{id}

Unlocks a Booking before the 20 minute automatic unlock

For when the User navigates away from the confirmation page or closes the browser tab.

### REQUEST

#### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	integer	ID of the Booking to delete

## RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

## 2.9 GET /bookings

Finds Bookings by User ID

## REQUEST

### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
*staffId	integer	The ID of the User

## RESPONSE

STATUS CODE - 200: Successful Operation

### RESPONSE MODEL - application/json

```
[{
  bookingId      integer
  startDate      string
  endDate        string
  user {
    staffId      integer
    email         string
    firstName     string
    lastName      string
    department    string
    valid         boolean
  }
  availabilityId  integer
  workspace {
    workspaceId   string
    staff {
      staffId     integer
      email        string
      firstName    string
      lastName     string
      department   string
      valid        boolean
    }
    floor {
      floorId      integer
      floorName     string
      location      string
      city          string
      building      string
      floorPlanUri  string
    }
  }
  features       [string]
}
```

```
}]
```

STATUS CODE - 400: Bad Request

---

## 2.10 POST /bookings

Confirm a temporarily locked Booking

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
bookingId	integer	

### RESPONSE

STATUS CODE - 200: Successful Operation

#### RESPONSE MODEL - application/json

```
{
  bookingId  integer
  startDate  string
  endDate    string
  user {
    staffId   integer
    email      string
    firstName  string
    lastName   string
    department string
    valid      boolean
  }
}
```

STATUS CODE - 400: Bad Request

---

## 2.11 DELETE /bookings/{id}

Cancel an upcoming Booking

### REQUEST

#### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	integer	ID of the Booking to delete

### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

---

# 3. OFFICEENDING

As an ICBC office owner, create Availabilities for fellow employees

## 3.1 GET /features

Get features by availabilityId, workspaceId, or all features if no params

### REQUEST

#### QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
availabilityId	number	
workspaceId	string	

### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

## 3.2 GET /locations

A list of all the location names

### REQUEST

No request parameters

### RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

[string]

## 3.3 POST /availabilities

Create an Availability (mark a workspace as available)

### REQUEST

#### FORM DATA PARAMETERS

NAME	TYPE	DESCRIPTION
startDate	string	
endDate	string	
workspaceId	string	
comment	string	

## RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
{
  availabilityId integer
  startDate      string
  endDate        string
  workspaceId    string
  workspaceName  string
  floorId        integer
  location       string
  bookings [{
    Array of object:
    bookingId integer
    startDate string
    endDate   string
    user {
      staffId integer
      email   string
      firstName string
      lastName string
      department string
      valid    boolean
    }
  }]
}
```

STATUS CODE - 400: Bad Request (Incorrect Request Body)

STATUS CODE - 403: Forbidden (Conflicting Dates)

### 3.4 GET /availabilities/owner

Finds Availabilities by the Staff ID of the owner

The Availabilities of the Workspace(s) associated with the Staff ID will be found.

## REQUEST

QUERY PARAMETERS

NAME	TYPE	DESCRIPTION
*id	integer	the Staff ID of the office owner

## RESPONSE

STATUS CODE - 200: Successful Operation

RESPONSE MODEL - application/json

```
[ {
  Array of object:
  availabilityId integer
  startDate      string
  endDate        string
  workspaceId    string
```

```
workspaceName  string
floorId        integer
location       string
bookings [{
  Array of object:
    bookingId   integer
    startDate   string
    endDate     string
    user {
      staffId    integer
      email      string
      firstName  string
      lastName   string
      department string
      valid      boolean
    }
  }
}]
```

STATUS CODE - 400: Bad Request

---

### 3.5 DELETE /availabilities/{id}

Cancel an Availability

#### REQUEST

##### PATH PARAMETERS

NAME	TYPE	DESCRIPTION
*id	integer	ID of the Availability to delete

#### RESPONSE

STATUS CODE - 200: Successful Operation

STATUS CODE - 400: Bad Request

---
